

Curriculum Vitae

Personal Details

Name: Joel
Surname: Nichols
Nationality: British
Email Address: me@joelnichols.co.uk
Website: <http://www.joelnichols.co.uk>

Introduction

My ambition is to work with website development projects. I have a deep interest in IT in general, and my focus for quite some time has been in website development and design, having worked as a freelance web developer for the past year and a half. I have worked primarily with HTML5, CSS3, PHP and MySQL to develop both themes and plugins for the WordPress content management system.

I have experience working with Linux based servers, running both CentOS 5 & 6 and Debian, for both website and game server services which I have offered. I also have experience managing active directory servers with Windows Server 2008 R2.

Relevant Skills

- Proficient with HTML5 and CSS3
- Experience with object oriented PHP and MySQL, as well as with MVC frameworks such as CakePHP.
- Have used a variety of Linux distributions, including Debian, Ubuntu, CentOS and Fedora.
- Developing WordPress themes and plugins as part of my freelance web development work.
- Configuring and managing LAMP stacks, along with Varnish Cache
- Experience configuring and managing dedicated and virtual servers.
